1. Introduction & Getting Started

1.1 System Overview

Welcome to the **ACME Security Services – Super Admin Portal**, a fully integrated security operations management system. As a Super Admin, you oversee the entire ecosystem — clients, guards, documents, roles, website content, and system configuration.

1.2 First-Time Setup

- Log in at your admin dashboard URL.
- Complete first-time configuration:
 - Organization details
 - Email/SMS settings
 - Creating additional admin roles

1.3 Navigation Guide

The left sidebar gives quick access to all modules:

- **Dashboard**
- **Client Management**
- **Document Management**
- **Guard Management**

- Roles & Users
 - Frontend Management
 - System Settings
-

2. Dashboard Overview

The dashboard gives a high-level snapshot of your operations.

2.1 Key Metrics

Section	Details	Actions
Total Clients	Active clients count, trends	Add/View Clients
Document Requests	Pending requests	Process/Review
Total Documents	Approved docs	Upload/Manage
Security Guards	Availability & assignments	Assign/View
Recent Documents	Last 6 uploads	Preview/Share
Recent Requests	Pending items	Approve/Reject
Quick Actions	Shortcuts	One-click ops
System Overview	Performance metrics	Monitor/Export

2.2 Quick Actions

- Upload Document
 - Manage Clients
 - View Document Requests
 - Company Documents
 - Manage Guards
-

3. Client Management

3.1 Client Directory

A comprehensive table showing:

- Contact details
- Assignment data
- Guard requirements
- Login activity
- Quick actions (View/Edit/Assign)

3.2 Adding a Client

Steps:

1. Click **Add New Client**
2. Fill details:
3. Personal Details
4. Company Info
5. Address
6. Service/Contract Details
7. Site Information
8. Guard Requirements
9. Emergency Contacts

3.3 Client Details Page

Overview Tab

Status, type, contract info, service locations

Details Tab

Full service info, emergency contacts, service history

Guards Tab

Assigned guards list, requirements, assignment history

Documents Tab

Uploaded documents, filters, upload options

3.4 Editing Clients

Update any client details. Changes trigger notifications.

3.5 Client Statuses

- **Active** – Full access
 - **Inactive** – Suspended
 - **Pending** – Verification required
-

4. Document Management

4.1 Document Categories

Client Documents

Agreements, Attendance, Bills, Salary Sheets, Pay Slips, ESI, PF, Employee Details, Training, Night Checking, Paid GST

Company Documents

MSME, GST, Pasara, PAN, Profile, Bank Details

4.2 Uploading Documents

Single Client Upload

Upload from client's **Documents Tab**.

Multiple Client Upload

Upload once → share with selected clients.

Company Documents Upload

Visible to all clients automatically.

4.3 Document Status

- Approved
- Pending
- Rejected
- Archived

4.4 Security Features

- Encrypted files
- View/download logs
- Download limits
- Auto-expiry for sensitive docs

5. Document Requests Management

5.1 Workflow

Client Request → Admin Review → Upload/Reject → Client Notified

5.2 Processing Requests

View request details: type, priority, due date → Take action.

5.3 Priority Levels

- High (24 hrs)
- Medium (3–5 days)
- Low (7–10 days)

5.4 Best Practices

- Acknowledge within **4 hours**
 - Communicate delays
 - Maintain history logs
-

6. Guard Management

6.1 Guard Directory

View guards with:

- Status, location, skills, availability

6.2 Add New Guard

Required:

- Personal details
- Professional info
- Salary
- Skills & certifications

6.3 Guard Status Types

- Available
- Assigned
- On Leave
- Terminated

6.4 Assigning Guards

Select guard → Set period → Add duty notes → Assign.

6.5 Performance Tracking

Attendance, feedback, incidents, training

7. Roles & User Management

7.1 Permission Model

Granular CRUD access for every module.

7.2 Default Roles

- **Super Admin** – Full access
- **HR Role** – Employee & salary docs
- **Client Role** – Dashboard + document requests only

7.3 Creating New Roles

Define role → Assign permissions → Create user → Issue temp password

7.4 User Management

Reset passwords, activate/deactivate, view login activity, export list

7.5 Security Best Practices

Apply **Least Privilege**, enforce strong passwords, review logs

8. Frontend Management

Manage your website without coding.

8.2 Modules

Our Services

Titles, descriptions, benefits, visibility

Gallery

Upload photos, categorize, manage visibility

Clients Section

Client logos, testimonials

Testimonials

Text/video reviews with author/company info

8.3 Publishing Workflow

Add → Preview → Publish → Schedule/Archive

9. System Settings

9.1 Email Management

- Daily limit: 295 emails
- Per user: 2 per day
- Auto-reset at midnight
- Fallback password reset system

9.2 Theme Customization

Themes: Sky Blue (default), Red, Green, Purple, Orange, Navy

9.3 Configuration Options

Org details, email templates, security settings, backups, API keys

10. Best Practices & Security

10.1 Daily Tasks

- Document requests
- Guard assignments
- Alerts & logs
- Data backup

10.2 Weekly Tasks

- Client satisfaction
- Access audits
- Storage review
- Guard performance

10.3 Monthly Tasks

Security audit, cleanup, optimization, compliance reports

10.4 Security Guidelines

- Strong credentials, 2FA

- Encrypted documents
- Regular updates
- Audit trails for compliance

10.5 Troubleshooting

Issue	Solution
Client can't login	Reset password/check status
Upload fails	Check file size & format
Email not sending	Check limits/SMTP
Guard assignment error	Check availability
Slow system	Clear cache, check server

11. Appendix

File Support: PDF, DOC, XLS, JPG, PNG, MP4, etc.

System Requirements: Latest browser, 5 Mbps Internet, JS enabled
