ACADEMIC PROJECTS

- **Weather Web Application (weather-app-q9yd.onrender.com)**
 - Developed a dynamic weather web application using the MERN stack (MongoDB, Express.js, React.js, Node.js). The app fetches real-time weather data from an external API and displays current weather conditions, forecasts, and relevant details for user-specified locations. Implemented responsive design for optimal viewing on various devices and utilized modern JavaScript libraries for a seamless user experience.
 - Technology used: React.js, JavaScript.
- **Real Time Tracker (track-everyone.onrender.com)**
 - Developed a real-time live location tracker using the MERN stack (MongoDB, Express.js, React.js, Node.js). The application features real-time location updates using Socket.io, and an interactive map interface with location markers. Implemented RESTful APIs for seamless data handling and integrated Leaflet API for enhanced mapping capabilities. Ensured efficient performance and scalability through optimized backend services and responsive frontend design.
 - Technology used: Node.js, Express.js, JavaScript.

PERSONAL PROJECTS (MAJOR PROJECT)

- **WONDERLUST (<https://wonderlust-y53s.onrender.com/listings>)**
 - Project Overview: Developed a full-stack WonderLust using the MEN stack (MongoDB, Express.js, Node.js). Implemented user authentication, property listings, booking system, and reviews. Focused on responsive design, ensuring compatibility across various devices. Emphasized clean, maintainable code and efficient database queries to enhance performance and user experience.
 - Programming languages: JavaScript, HTML, CSS
 - Backend frameworks/libraries: Node.js, Express.js
 - Databases: MongoDB.
 - Version control: Git, GitHub (<https://github.com/Aqib-kha9/WonderLust>)
